What is the estimated market value of the existing structure (not including the value of the land)?
\$ _____

NOTE: An existing structure must comply with the flood protection standards if it is substantially improved (an improvement equal to or greater than 50% of the market value of the structure). FEMA maintains that the "substantial improvement" definition applies to existing structures only and that once a structure meets the definition of "new construction" any further improvements to that structure must meet "new construction" requirements. For floodplain management purposes "new construction" means structures for which "start of construction" began on or after the effective date of the initial Flood Insurance Rate Map issued by FEMA for the community. The estimated market value must be based on County Auditor's Structural Market Value or from a licensed Appraiser's report showing the value of the structure without the land value included.
